

HAZEL PERNANDA PUTRA
DATA ANALYTICS ENTHUSIAST

Personal Website: hazel00110.github.io | hazelfernanda001@gmail.com | 085163506583 | linkedin.com/in/hazelpernanda

PROFILE

Mathematics graduate from Universitas Padjadjaran with hands-on experience using Python, SQL, and Tableau for data analysis and visualization. Built an end-to-end grocery inventory analytics portfolio project analyzing 990 products and 350 suppliers through data cleaning, SQL-based analysis, scoring models, and dashboard development. Experienced in high-volume data evaluation through reviewing 8,000+ AI-generated images with >95% daily accuracy. Strong in quantitative reasoning, data validation, and communicating analytical findings through clear visualizations.

EDUCATION

Universitas Padjadjaran – Jatinangor, West Java Aug 2020 - Feb 2026
Bachelor of Mathematics, GPA: 3.05/4.00

- Undergraduate thesis: “Spices Image Classification using Convolutional Neural Network with Transfer Learning EfficientNetB0” https://github.com/hazel00110/spices_classification_efficientnetb0

PROFESSIONAL EXPERIENCE

Data Annotator ICVG, Appen x ByteDance – Remote Mar 2026 - Present

- Contributed to the development of a human-evaluated dataset for ranking AI-edited images generated by multiple AI models, building on the foundation of the ICVG project.
- Labeled and verified over 8,000 AI-generated images for subject identity consistency across multiple reference inputs, maintaining a daily labeling accuracy rate of >95%.
- Led Quality Alignment (QA) tasks by resolving annotation conflicts, ensuring final labels met strict accuracy and visual criteria.
- Assessed image fidelity based on shape, color, texture, and compliance with formatting guidelines.
- Scored generation outputs based on text-prompt alignment, context accuracy, and visual coherence.

Private Mathematics Olympiad Tutor – Freelance July 2025 - Present

- Guided and mentored students in advanced mathematics topics, focusing on problem-solving techniques and strategies for competitive mathematics olympiad exams.
- Prepared students for various stages of mathematics olympiad competitions, including national and international levels.
- Supported students in achieving strong competition results, including gold medal achievements.

Ads Quality Rater, Welocalize – Remote Feb 2026 - Apr 2026

- Reviewed and evaluated 1,600+ internet advertisements to ensure relevance and quality for end users, contributing to improved ad delivery accuracy.

Website QA – Freelance (Upwork) Nov 2025

- Evaluated website functionality and user experience from an end-user perspective.
- Identified usability issues and inconsistencies, providing structured feedback for improvement.

SELECTED PROJECT EXPERIENCE

Grocery Inventory Analysis – Personal Project

https://public.tableau.com/views/GroceryInventoryAnalysis_17808873066200/Dashboard1
https://github.com/hazel00110/grocery_inventory_analysis

- Built an end-to-end inventory analytics pipeline (Python, PostgreSQL, Tableau) analyzing 990 products and 350 suppliers to surface stockout risk, revenue prioritization, and supplier reliability.
- Cleaned and structured raw data in Python; engineered 5 layered SQL views in PostgreSQL using window functions, CTEs, and weighted scoring models (ABC segmentation, reorder urgency, supplier risk).
- Published an interactive 3-page Tableau Public dashboard and documented the full pipeline on GitHub.

Website Building: Nata Loka - Interior Design Bandung – Freelance Mar 2026

<https://nataloka.id/>

- Designed and developed a CMS-driven portfolio system to enable flexible content management.
- Structured scalable content models for efficient project organization and future expansion.
- Built modular and maintainable components using PHP, HTML, CSS, and JavaScript.

Dynamic Model of Varicella (Chickenpox) with a Non-linear Force of Infection – Jatinangor, West Java Dec 2025

Research Project - Faculty Collaboration, FMIPA UNPAD

- Collaborated with a faculty member to develop a non-linear SEITR compartmental model using Python to simulate varicella transmission dynamics.
- Analyzed model parameters and disease transmission scenarios to understand changes in disease progression.
- Developed an interactive GUI-based simulation with adjustable parameters and dynamic visualizations to communicate modeling results.
- Applied mathematical modeling, analytical thinking, and systematic problem-solving throughout the project.

Majelis Perwakilan Anggota Himatika FMIPA Unpad – Jatinangor, West Java Jan 2022 – Jan 2023

Jan 2022 – Jan 2023

- Assisted the Chair in leading and coordinating a 10+ member team in overseeing organizational activities.
- Facilitated internal discussions and evaluations to promote accountability and organizational compliance.
- Monitored activities across multiple commissions to ensure alignment with organizational goals.
- Collaborated with relevant stakeholders to address organizational issues and develop effective solutions.

May 2021 - Mar 2022

- Coordinated a large-scale university outreach program involving 10 divisions, delivering educational activities (roadshows, tryouts, webinars, and social media campaigns) across 90+ schools in Sukabumi.
- Managed multiple activities and stakeholders to ensure program execution aligned with established objectives.

May 2022 - Mar 2023

- Provided strategic oversight for the continuation of a large-scale university outreach program.
- Monitored program direction and ensured alignment between divisions and overall organizational objectives.
- Supported decision-making and coordination to improve the execution of subsequent program activities.

Mar 2021 - Nov 2021

- Led a 7-member team responsible for publication, design, and event documentation.
- Coordinated task allocation and project execution to ensure deliverables were completed according to deadlines.
- Collaborated with other divisions to maintain consistent event branding and communication.

- **Technical Skills:** Python, Tableau, SQL, PostgreSQL, BigQuery, Pandas, NumPy, Data Cleaning, Data Wrangling, Data Analysis, Data Visualization, Microsoft Office (Excel, PowerPoint, Word), Google Workspace (Sheets, Slides, Docs).
- **Analytical Skills:** Quantitative Analysis, Analytical Thinking, Problem Solving, Statistical Modeling, Mathematical Modeling, Data Validation, Machine Learning, Data Cleaning, Data Visualization, Attention to Detail.
- **Leadership & Management:** Team Coordination, Project Management, Stakeholder Management, Communication, Time Management.

DQLab – Bootcamp Machine Learning & AI for Beginner, Batch 12
Aug 2024

- Learned foundational skills in data extraction, data cleaning, data standardization, relational data integration, and data quality validation to prepare datasets for further analysis.

Aug 2026

- Completed a series of SQL modules covering SELECT statements, JOIN & UNION, logical operators, GROUP BY & HAVING, text processing with REGEX, and database management.

May 2023 – Aug 2026

- Completed a series of Python modules covering fundamentals, data wrangling, REGEX-based text processing, and data science applications (Python for Data Professional, Part 1–3).

Apr 2025

- Developed practical skills in computer vision and image processing using Python, Pillow, and OpenCV, including image filtering, enhancement, classification, object detection, and transfer learning with a pre-trained deep neural network for image classification.

Jan 2026

- Score: 553 (TOEFL ITP equivalent) Valid until: 28 Jan 2028

Jun 2023

- Participated in developing a hotel price prediction model using regression techniques and evaluated model performance using Mean Absolute Error (MAE).
